New Insights into Pediatric Otolaryngology

Message from the Guest Editors

The field of pediatric otolaryngology is under constant development. Our aim is to provide the latest clinical knowledge and scientific research, allowing us to excel in our professional growth and expand clinical applications. This Special Issue intends to highlight the current state of research on the most common ENT disorders in children. Topics of interest include, but are not limited to, adenoid hypertrophy/adenoiditis, rhinosinusitis (acute and chronic), otitis media with effusion, acute otitis media, obstructive sleep apnea, hearing loss, deafness, and speech disorders. Experts in this field are invited to submit manuscripts on all related topics. Original research papers, literature reviews, and systemic reviews are welcome. We look forward to receiving your contributions to this Special Issue, which will provide valuable insights into all aspects of current trends in pediatric otolaryngology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
