

## Special Issue

# Diagnosis and Treatment of Kidney Stones

### Message from the Guest Editor

Current endoluminal technology has acutely improved owing to the advancement of the ureteroscope, laser equipment, ureteral access sheath, miniaturized devices, and robotics. All stone management approaches aim at an improved patient QOL. Therefore, we must develop strategies and outcomes with less invasiveness, fewer complications, and less recurrence. There are now a lot of available tools in our clinical practice and we must know and understand how to use them correctly. For this Special Issue, we would like you to share your minds and spread the importance and necessity of the specific endoluminal field as a sub-specialty.

---

### Guest Editor

Dr. Takaaki Inoue

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.
