

Special Issue

Thoracic Surgery: Current Challenges and Future Perspectives

Message from the Guest Editors

This Special Issue aims to provide a comprehensive overview of the latest advancements, emerging trends and unresolved challenges in the field of thoracic surgery. In this Special Issue, we invite submissions that address various topics related to thoracic surgery, including, but not limited to, minimally invasive techniques, robotic-assisted surgeries, lung cancer management, esophageal disorders, mediastinal tumors, pleural diseases, thoracic trauma, lung transplantation, lung segmentectomies, pneumothorax, 3D printing, surgical planification and artificial intelligence. We encourage original research articles, review papers and perspectives that explore novel approaches, innovative technologies and evidence-based practices in thoracic surgery. We welcome contributions from researchers, surgeons and healthcare professionals working in the field of thoracic surgery. Manuscripts should adhere to the scope of clinical research and provide valuable insights into the advancements, challenges and future directions of thoracic surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
