Updates on the Clinical Applications of Dental Restorative Materials

Message from the Guest Editor

It is quite clear that clinical results achieved in restorative dentistry are due to personal clinical skills, but are also intricately linked to the continuous development of innovative materials. The integration of modern dental materials has undeniably propelled restorative dentistry towards unprecedented achievements. In recent years, the development and the introduction of new dental materials across restorative and prosthetic dentistry has been supported by effective in vitro pre-clinical research, but it has not always been paralleled by robust clinical research, resulting in clinicians encountering materials that may not necessarily outperform their predecessors. Consequently, there is a pressing need for clinical studies to establish substantial evidence for the efficacy of recently introduced dental materials in the field of restorative dentistry. I am pleased to announce a call for submissions to this Special Issue, and I am inviting researchers to submit high-quality clinical research articles and reviews that delve into the latest advances and updates of restorative dentistry and dental restorative materials.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
