State-of-the-Art Research on Vitreoretinal Disorders

Message from the Guest Editors

Vitreoretinal diseases often impair vision and even lead to permanent blindness. Early diagnosis and treatments provide benefits for preventing vision impairment in those patients. Recent progress on the understanding and treatment of vitreoretinal diseases has been revolutionary. Novel retinal imaging techniques and laboratory examinations have been widely employed in the early detection and diagnosis of retinal disease. To better understand vitreoretinal diseases, in-depth understandings of the mechanism, clinical features, and preclinical/clinical trial results are still warranted. In this Special Issue, we welcome reviews and original articles which provide novel findings in vitreoretinal diseases. Interests include, but are not limited to:

- Age-related macular degeneration
- Diabetic retinopathy
- Retinal vascular disease
- Retinal pigmentosa
- Role of chronic inflammation in retinopathy
- New biomarkers in vitreoretinal diseases
- Congenital retinopathy
- Pediatric retina vascular diseases
- Cell therapy trials
- Genotyping/phenotyping studies
- Examination of intraocular fluids
- Engineering exosome or gene therapy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
