Oral and Maxillofacial Surgery –Current Advances and Future Directions

Message from the Guest Editors

The proposed Special Issue titled "Oral and Maxillofacial Surgery—Current Advances and Future Directions" aims to review the advances being made in the clinical field of oral and maxillofacial surgery and explore possible research directions for the future. We invite original or review articles on many of the latest trends in artificial intelligence, computer-assisted orthognathic surgery, static or dynamic guided implant surgery, robotic surgery, 3D printing, etc. In addition, we also welcome papers on unique variations in clinical techniques or approaches with improved results or effectiveness. Overall, this Special Issue aims to provide a comprehensive understanding of the latest clinical findings in the field of oral and maxillofacial surgery, suggesting future research directions for clinicians based on this knowledge.
