

## Special Issue

# Advances in Segmentectomy and Lobectomy of the Lung

### Message from the Guest Editors

The first two decades of the 21st century have been marked by a huge revolution in the field of lung surgery. The mainstay of this process has been the advent of minimally invasive approaches. Nowadays, video-assisted thoracic surgery (VATS) and robot-assisted thoracic surgery are becoming the gold standard in a vast majority of thoracic surgery centers worldwide. Furthermore, the basic VATS technique has been subjected to refinements and improvements that allowed for a progressive translation from the standard three-port approach to the single-access approach. Ongoing technological achievements such as tridimensional computed tomography and bronchoscopy navigation are also expected to further improve the overall quality of minimally invasive lung resections. The scope of this Special Issue is to take stock of the situation regarding indications, techniques, results, and unsolved problems of minimally invasive lung resections. We welcome original studies and reviews regarding all these points, with a view to future developments and innovations.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
