New Advances in Wound Healing and Skin Wound Treatment

Message from the Guest Editor

The treatment of skin defects, including burns, traumatic skin defects, and chronic wounds such as DFUs and VLU, has seen significant progress in recent years. This is largely due to advances in research into the pathophysiology of wound healing in various conditions, as well as the introduction of new treatment devices and drugs, the use of wound healing matrices such as CAMPs, and the introduction of regenerative medicine and tissue engineering. Another key focus is on local infections and biofilms that impede wound healing, and new strategies and treatment approaches are currently being developed. There have also been significant advances in the treatment of ischemic wounds. Thus, we are launching this Special Issue to share new knowledge on wound care. We invite researchers from around the world to submit their work showcasing new perspectives on wound healing, innovative technologies, and evidence-based practice. Our goal is to highlight advances that will revolutionize wound healing and ultimately improve outcomes for patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
