

Special Issue

Epidemiology, Translation and Clinical Research of Ophthalmology

Message from the Guest Editors

This Special Issue focuses on ophthalmology epidemiology, translational and clinical research, covering the whole visual system, including the cornea, lens, vitreum, retina, choroid and optic nerve, etc. Research methods include but are not limited to statistical methods, artificial intelligence, and biology experiments. In epidemiology, descriptive or analytical studies addressing the prevalence, risk factors, and preventive measures of eye diseases are welcome. We would also like to receive studies using ophthalmic information as novel biomarkers of systemic diseases. Translational research dedicated to bridging novel screening, diagnostic and therapeutic technologies to clinical practice will also be included in this Special Issue. In terms of clinical research, randomized or non-randomized controlled studies focusing on ophthalmic diseases will both be considered. In addition, secondary research based on evidential analysis of published clinical evidence, such as meta-analyses, is also welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
