

## Special Issue

# Clinical Research on Aortic Valve Replacement

### Message from the Guest Editors

Aortic disease is the most common valvular heart disease. Additionally, while the number of procedures in Western countries has consistently dropped in favor of transcatheter aortic valve implantation (TAVI), surgical replacement (SAVR) remains the gold standard. The wide range of diseases that can be treated by SAVR (e.g., insufficiency, subvalvular stenosis, endocarditis, bicuspid degeneration, tumor) but also the evidence concerning the long-term outcomes are the main reasons SAVR remains the gold standard of the aortic valve disease. However, continuous efforts seek to minimize the burden of the surgery and to address unresolved issues, such as choice of intervention in patients with bicuspid aortic valve or the possibility to repair the valve, and also how to make TAVI and SAVR complementary and not competitive. This Special Issue aims to address some of these gaps, including pre-procedural planning, streamlining of procedures, and post-procedural management, to improve clinical outcomes and ensure the best lifetime management for these patients. Both original research contributions and state-of-the-art reviews are welcome.

### Guest Editors

Prof. Dr. Theodor J.M. Fischlein

Department of Cardiac Surgery, Klinikum Nürnberg, Paracelsus Medical University, 90471 Nuremberg, Germany

Dr. Francesco Pollari

Cardiac Surgery Department, Klinikum Nürnberg-Paracelsus Medical University, 90419 Nürnberg, Germany

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
