Diagnosis and Management of Aortic Diseases: Drafting from Theoretical Aspects to Clinical Practice

Message from the Guest Editors

Aortic diseases can sometimes present as dramatic emergencies (including ruptured aneurysms, complicated dissections, and traumatic transections) that portend an immediate danger to patients' life. The treatment of these critical scenarios has nowadays shifted towards increasingly complex surgical and endovascular techniques, owing to increased knowledge in many aspects including pathophysiology, imaging, as well as medical and invasive treatment.

The proposed collection "Diagnosis and Management of Aortic Diseases: Drafting from Theoretical Aspects to Clinical Practice" will encompass a selection of research works from experts in the field of aortic medicine, detailing various aspects for basic, clinical and translational research as they may apply to the diagnosis and treatment of aortic diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France
