

Special Issue

Advanced Endoscopic Technology for Digestive Diseases

Message from the Guest Editor

Huge advances are being made in gastroenterology, and especially the field of advanced endoscopy, every year. Endoscopic submucosal dissection, endoscopic ultrasound, and new imaging techniques have revolutionized the way in which we treat benign and malignant gastrointestinal diseases. Artificial intelligence is changing the landscape of this field, with wide-reaching applications which range from improving adenoma detection rates during colonoscopy, to aiding the management of malignant biliary strictures during cholangioscopy. This Special Issue aims to explore the novel advances in the field of advanced endoscopy and to discuss the ways in which they can improve our daily clinical practice of gastroenterology. The articles in this Special Issue focus on the latest advances in the field of therapeutic endoscopy and cover a wide range of topics including diagnostic and therapeutic procedures, as well as new devices and instruments and novel techniques for visualization, which are transforming our approach to patient care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
