New Advances in Systemic Lupus Erythematosus (SLE)

Message from the Guest Editor

Systemic lupus erythematosus (SLE) is a chronic autoimmune disease characterized by immune-mediated inflammation affecting multiple organs. Due to a wide range of clinical manifestations, early diagnosis remains challenging. Furthermore, no single biomarker is currently available to definitively establish the diagnosis, assess disease activity, or predict disease progression. Although advances in disease control have led to improved survival over the years, patients with SLE continue to experience higher morbidity and mortality (standardized mortality ratio: 2.66). To improve the prognosis, novel and targeted therapies are actively being developed to minimize disease activity and organ damage, as well as enhance quality of life. This Special Issue on “New Advances in Systemic Lupus Erythematosus (SLE)” is now open for submissions. We welcome your contributions focusing on recent progress in the diagnosis and treatment of SLE.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
