

Special Issue

Clinical Perspectives on Cardiac Electrophysiology and Arrhythmias

Message from the Guest Editors

The field of electrophysiology and cardiac arrhythmias is experiencing consistent growth, with new therapeutic procedures emerging to improve the prognosis of cardiovascular patients. Great progress has been achieved in terms of pacing therapy, cardiac resynchronization therapy, and catheter ablation, introducing important clinical implications. Moreover, the significant burden of atrial fibrillation on healthcare systems persists, despite substantial research efforts, and remains an important issue; thus, further studies regarding underlying mechanisms and effective treatments are of great interest. This Special Issue of the *Journal of Clinical Medicine*, on “*Clinical Perspectives on Cardiac Electrophysiology and Arrhythmias*”, will focus on recent research in the field of diagnostics and the treatment of arrhythmias and electrophysiology. We welcome papers summarizing the current state of knowledge, those related to specific arrhythmogenic diseases (e.g., atrial fibrillation, cardiomyopathies, electrical storm), as well as those highlighting the field of interventional electrophysiology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
