Endometriosis: Current Insights and Treatments

Message from the Guest Editor

Endometriosis is a disease that is increasing in terms of the incidence of diagnosis and poses a growing challenge to both the medical and patient communities. The existing treatment options, which encompass surgical procedures and hormonal or non-hormonal medical therapies, often fall short of achieving satisfactory symptom control. Additionally, delayed and/or inadequate diagnosis can lead to individuals affected by this condition experiencing a reduction in their quality of life due to pain and infertility. This often persists for decades before they receive comprehensive care. The creation of certified endometriosis centers has helped individuals with this disease to access surgical interventions performed by endometriosis specialists; however, many of these centers are not yet equipped to provide the extensive multidisciplinary management modalities that are required for long-term support for these patients. This Special Issue will provide a comprehensive overview of treatment strategies for chronic symptomatic endometriosis. We invite submissions that explore contemporary treatment options for this condition.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
