

## Special Issue

# Surgical Precision: The Impact of AI and Robotics in General Surgery

### Message from the Guest Editor

The adoption of minimally invasive surgery (MIS) is arguably the most important surgical development over the past four decades, allowing for rapid recovery from many procedures. Computer-assisted laparoscopy in the form of robotic platforms has gained traction more recently, and we are witnessing a surge in the number of general surgical procedures performed robotically. There are many perceived benefits of robotic platforms compared to both laparoscopy and open surgery. However, there is no clear consensus on whether this results in improved patient outcomes. The emergence of artificial intelligence (AI) has opened new avenues for applying computers to improve healthcare. There has been a rapid increase in AI across other specialties, notably radiology, which has laid the path for applying computer science to surgery. This issue will explore the evidence to date, comparing robotic and open operations in general surgery and highlight the technological advances being made to support surgical training, decision making, and operations, possibly improving surgical patient journeys in the future.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
