Clinical Research and Personalized Medicine in Inflammatory Bowel Disease

Message from the Guest Editors

Over the last several decades, advances in clinical research, immunology, and precision medicine have transformed our understanding of the pathogenesis of IBD, leading to more targeted and individualized treatment approaches. However, despite this progress, many questions remain unanswered regarding disease progression, therapeutic responses, and patient-specific factors influencing outcomes. This Special Issue, "Clinical Research and Personalized Medicine in Inflammatory Bowel Disease", will provide a comprehensive platform for innovative research aimed at improving our ability to tailor treatments to individual patients. With the rise in genomics, microbiome analysis, and artificial intelligence in healthcare, we are at a pivotal moment in the evolution of IBD management. This Special Issue will explore novel diagnostic tools, predictive biomarkers, patient stratification strategies, and innovative therapeutic interventions, bridging the gap between research and clinical applications. We invite original research articles and reviews that contribute to this growing field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
