Advances and Trends in Visceral and Gastrointestinal Surgery

Message from the Guest Editor

Visceral and gastrointestinal surgery is a primary treatment option for oncological diseases in the abdominal cavity, as is bariatric and visceral reconstructive surgery. Recently, this field has seen significant advancements, with progress in methods reaching a very high level. The rapid emergence of new devices and techniques can sometimes be overwhelming. The advancements in minimally invasive robotic surgery, the use of lasers, the application of single-port instruments, and the assistance of AI in treatment processes are all areas that require in-depth research. New scientific studies are underway, and better treatment combinations are being explored. This Special Issue aims to discuss advanced treatment methods and disseminate the latest research on developing and introducing new devices and techniques for colorectal cancer treatment. We welcome submissions of original articles, clinical trials, systematic reviews, and meta-analyses.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
