

## Special Issue

# Application of Magnetic Resonance Imaging (MRI) in the Diagnosis, Staging and Follow-Up of Oncological Diseases

### Message from the Guest Editor

Thanks to the impressive technological developments of recent decades, magnetic resonance imaging (MRI) has become a cornerstone of the diagnosis, staging, and follow-up of many oncological diseases. Abdominal, pelvic, and musculoskeletal applications have been developed and now feature alongside initial neuroradiological applications. Thanks to the introduction of new sequences and AI-based reconstruction techniques, classic morphological MR imaging has increased grown in its spatial and contrast resolution, and acquisition times have decreased. Both functional and structural information can now be extrapolated from the products of MRI (e.g., mappings, advanced diffusion techniques, perfusion techniques, etc.), and efforts have been made to enable tissue characterization by means of MRI. Moreover, the field of radiomics promises to revolutionize the evaluation of imaging. This Special Issue welcomes original research and review articles about the use of MRI in the diagnosis, staging, and follow-up of oncological diseases.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
