

## Special Issue

# Management of Female Pelvic Floor Disorders and Incontinence

### Message from the Guest Editor

Female pelvic floor disorders (PFDs), including urinary incontinence, pelvic organ prolapse, and voiding dysfunction, are highly prevalent conditions that significantly affect quality of life and functional independence across the lifespan. Their management poses substantial clinical challenges, often requiring tailored, multidisciplinary approaches and long-term care strategies. This Special Issue aims to provide a clinically relevant overview of advances in diagnosis and treatment within the field. We invite contributions focusing on clinical studies, surgical innovations, conservative treatments, and interdisciplinary collaboration in urology, urogynecology, and pelvic health. We welcome original research and reviews that address surgical techniques, treatment outcomes, diagnostic pathways, patient engagement, and integrated models of care. We seek to shape the future of pelvic health through evidence-based clinical practice.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
