Clinical Management of Parkinson's Symptoms

Message from the Guest Editors

Parkinson disease (PD) is the second most frequent neurodegenerative disease after Alzheimer's disease. People living with PD present a wide variety of symptoms, including motor symptoms and non-motor symptoms. As the disease progresses, the effect of the medication decreases over time (wearing off), leading to fluctuating and difficult-to-control symptoms and thus greatly worsening patients' quality of life. That patients often do not perceive the manifestations of the disease, and therefore cannot accurately report their time course, further complicates therapeutic adjustment. This Special Issue will include research on the early identification of the various symptoms of Parkinson's disease or their fluctuation via different means. Research on progression markers aiming to enhance the understanding of these symptoms is also welcome. We welcome papers aimed at improving the clinical control of patients by any means, including innovations in the care process and non-pharmacological therapies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
