

Special Issue

Fertility and Reproductive Health in Women

Message from the Guest Editor

During the last decade, fertility and reproductive health have become increasingly prominent areas of clinical and research focus, driven by global trends such as delayed childbearing, rising infertility prevalence, and expanding utilization of assisted reproductive technology (ART). At present, emerging technologies are rapidly reshaping fertility assessment and treatment strategies. This Special Issue will present and disseminate high-quality, clinically relevant research that advances understanding of fertility and reproductive health in women by integrating basic mechanisms, translational science, and real-world clinical outcomes. Topics of interest for this publication include, but are not limited to, assisted reproductive technologies and ART outcomes; ovarian reserves, reproductive aging, and diminished ovarian function; polycystic ovary syndrome and metabolic–reproductive interactions; endometriosis and fertility; fertility preservation in oncological and non-oncological settings; reproductive genetics and epigenetics; artificial intelligence and digital tools in reproductive medicine; and reproductive surgery.

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
