Recent Advances in Diagnosis and Treatment of Vestibular Disorders—2nd Edition

Message from the Guest Editors

Vestibular medicine centers around the assessment, diagnosis, and treatment of patients with dizziness and vertigo, and, in all these fields, there has been an enormous expansion of research in recent years, the best of which we seek to collate in this Special Issue. New methods of treatment, frequently administered at tertiary referral centers, include both common drugs and uncommon medications that have been demonstrated to be applicable to these types of disorder. Gene therapy appears to be possible thanks to the enormous efforts of the genetic mapping of some diseases. On the other hand, surgery, requiring precise anatomical knowledge, being applicable for disabling and unresponsive forms of disease, with new vestibular implants representing a way to solve the most disabling situations when both vestibular systems are nonfunctional. Topics that are welcome in this Special Issue include, but are not limited to, the epidemiology of dizziness, the role of genetics in the development of vestibulopathy, diagnostic approaches, and interventions for patients with dizziness and vertigo, such as medical treatment, surgery, and vestibular rehabilitation.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
