New Advances in Optic Nerve Diseases

Message from the Guest Editor

The presence of papilledema, a marker of potential intracranial hypertension or optic nerve disease, can sometimes be exceedingly difficult to diagnose, despite recent advancements in ophthalmic technology. Optic nerve diseases, also known as optic neuropathies, are neurodegenerative disorders that can put patients' vision at serious risk, especially if they are not identified early. In recent years, ocular diagnostic technology (ocular ultrasound, OCT, etc.), as well as new genetic discoveries, have provided new answers and increased our knowledge about this complex group of pathologies, which poses a compelling challenge in ophthalmology but also in the medical field in general. The purpose of this Special Issue will be to promote research on the new advances in optic nerve diseases, going from etiology, to diagnosis and to treatment, trying to better understand the nature of these challenging diseases and how to deal with them.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
