

## Special Issue

# Sports Injuries: Recent Advances in Prevention and Rehabilitation

### Message from the Guest Editor

Sports injuries are commonly caused by overuse, direct impact or the application of force that is greater than the body part can structurally withstand. Sports injuries can occur throughout your body: bones, muscles, tendons, ligaments and other structures. Due to the frequent occurrence of sports injuries, the prevention and rehabilitation treatment of sports injuries is very important. Prevention helps reduce potential sports injuries and includes primary, secondary and tertiary injuries. The ultimate goal of the rehabilitation process is to limit the extent of the injury and reduce or reverse the impairment and functional loss. This Special Issue aims to combine the latest research in the fields including, but not limited to, sports injury prevention and treatment, musculoskeletal disorders, sports injury rehabilitation, physical rehabilitation, exercise science and sports science. We look forward to pushing forward the clinical, translational and basic research of these promising new treatment method technologies.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
