Retinal Dystrophies—Structure and Function Relationship

Message from the Guest Editor

This Special Issue aims to explore the relationship between structural changes and functional impairment in retinal degenerative diseases such as retinitis pigmentosa. Through clinical observation, the degeneration mechanism of photoreceptor cells and its impact on visual function will be analyzed, emphasizing the importance of early diagnosis and intervention. In addition, the Special Issue will also discuss emerging treatment strategies, including gene therapy, cell therapy, and drug intervention, to guide clinical practice. Moreover, investigations of structural changes in the visual pathway observed in patients with retinal dystrophies are also welcome, as they may be important in future clinical trials. We hope that the publication of this Special Issue will promote the understanding and research of retinal degenerative diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
