Cardiomyopathies: State of the Art Knowledge

Message from the Guest Editors

In recent decades, the nosography of cardiomyopathies has changed rapidly to support physicians in increasingly fine-tuned diagnoses and more targeted therapy. Cardiomyopathies are a public health problem since about 50% of patients who die suddenly in childhood or adolescence, or undergo cardiac transplantation, belong to the wide spectrum of this condition. Novel cardiomyopathies have been discovered and acknowledged by World Health Organization classification. New etiologies and pathophysiological mechanisms have also been described. Cardiomyopathies are diagnosed with increasing accuracy thanks to multimodality imaging and genetics tests. The advances in diagnosis made possible to move toward tailored and often personalized therapies. The goal of this Special Issue is to update the clinicians by providing a comprehensive collection of review articles, original researches, case reports and editorials. The aim is to share the latest knowledge regarding pathophysiology, diagnosis and treatment of cardiomyopathies, and present innovations that have the potential to improve the clinical outcome of this heterogeneous patients' population.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
