Cutting-Edge Research on Psoriasis

Message from the Guest Editors

Psoriasis is a common, chronic, inflammatory, immune-mediated disease, primarily affecting the skin. It is characterized by abnormalities in innate and acquired immunity, hyperproliferation, and abnormal differentiation of epidermal keratinocytes. Psoriasis is a systemic, multifactorial disease associated with psoriatic arthritis in approximately one-third of patients, so early recognition and effective treatment are critical for patients. In addition, people with severe psoriasis are at higher risk for metabolic and cardiovascular disease. The development of new effective treatments for psoriasis has changed the prognosis and the life of many patients around the world, but there is a strong need for more real-world experiences of these drugs. This Special Issue entitled “Cutting-Edge Research on Psoriasis” is now open for submissions, welcoming both original researches and reviews that describe the latest treatment strategies and clinical management approaches related to psoriasis.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
