Clinical Advances and Challenges in Interventional Cardiology

Message from the Guest Editor

Recently, interventional cardiology has advanced in light of improvements in revascularization strategies (PCI or CABG), the treatment of structural heart disease modality (TAVR, mitral clip, etc.), and various medications. The prevalence of intravascular imaging modalities can improve the prognosis of patients at PCI. We aim to propose new insights of interventional cardiology in our innovatively changing clinical practice, including new imaging modalities and new markers and tools for prognosis and revascularization strategies or medical treatments that are developed and successfully implemented in real-world practice. This Special Issue aims to collect a series of articles specifically related to “Clinical Advances and Challenges in Interventional Cardiology”. Therefore, interventional cardiologists are encouraged to submit their clinical studies and research as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
