

## Special Issue

# Critical Limb Ischemia: Current Challenges and Future Prospects

### Message from the Guest Editors

The journal JCM launched a Special Issue titled "Critical Limb Ischemia: Current Challenges and Future Prospects". Recent innovations in endovascular treatment, such as thrombectomy, atherectomy, and lithotripsy, have created great opportunities to improve treatment algorithms in PAD and, possibly, patient-related outcomes. In addition, the role of biomarkers, which is well-established for the risk stratification of patients with cardiac diseases, is less known in patients with PAD. This Special Issue aims to collect original articles and reviews investigating pathophysiologic, diagnostic, and therapeutic aspects related to the risk stratification and management of PAD patients.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
