Diabetic Foot and Other Complications of Diabetes: Clinical Management and Prevention

Message from the Guest Editors

In spite of the recent advancements achieved in the diagnosis and treatment of diabetes, the disease is still considered a global epidemic, and the effects of diabetic foot and other complications contribute to worse survival rates than common cancers such as prostate or breast cancer. In addition, these complications are a leading cause of disability and decreased quality of life; however, these outcomes are readily preventable with evidence-based disease care. In this Special Issue, we hope to compile up-to-date articles and reviews on aspects of the diabetic foot and other complications of diabetes, ranging from a multidisciplinary approach to the prevention and management of these serious complications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
