Latest Advances and Prospects in Management of Polytrauma Patients

Message from the Guest Editors

Polytrauma remains a global health concern and has been identified as a key issue for the future of healthcare by the World Health Organization. Despite advances in diagnostic and treatment algorithms, trauma remains a leading cause of mortality and disability worldwide and represents a prominent cause of mortality in young adults due to increased road traffic accidents. Adopting a multimodal approach for the treatment of polytraumatized patients has been proven to lead to better results in terms of outcome. However, in our opinion, we could improve several steps in the treatment of this complex condition, and we could deepen our comprehension of the pathophysiological and immunological response to trauma. With this Special Issue, we want to provide an update about the latest advances and prospects in the management of this group of patients. We encourage the submission of original articles and systematic reviews from specialists involved in the management of polytraumatized patients. We invite researchers in the polytrauma field to submit their contributions in order to provide a comprehensive understanding of this issue from a wide spectrum of perspectives.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
