Recent Advances and Emerging Therapeutic Approaches for the Treatment of Heart Failure

Message from the Guest Editors

Heart failure (HF) has been described as a growing epidemic, due to the ageing population as well as the improvement in survival after its diagnosis. Despite striking advances in recent years, considerable uncertainties still surround its pathophysiologic mechanisms and optimal management. This Special Issue of the *Journal of Clinical Medicine* aims to highlight the recent advances and the emerging therapeutic approaches in the field of HF management. Researchers will have the opportunity to publish both original research and review articles related to contemporary findings about both invasive and non-invasive treatment of HF across the spectrum of ejection fraction. This Special Issue aims to contribute to the implementation of novel therapeutic approaches regarding holistic, personalized, and patient-centered management of HF in everyday clinical practice.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
