

## Special Issue

# Hepatobiliary Surgery: State of the Art and Future Perspectives

### Message from the Guest Editors

Hepatobiliary surgery is a complex procedure that often requires personalized surgical planning. A heterogeneous group of diseases, from benign conditions to primary and metastatic tumors, can be treated with hepatobiliary surgery. A careful evaluation of the patient is essential. When surgery is indicated, it is important to assess the future liver remnant (FLR) volume and function to plan the amount of liver to be resected. Anatomical study is essential in visualizing a hepatic lesion and its relationship with neighboring structures. Anomalies and variants should be studied during surgical planning. Patients with an insufficient FLR could benefit from portal vein embolization, generating compensatory hypertrophy, allowing the resection of hepatobiliary tumors initially defined as unresectable.

Our aim for this Special Issue is to provide an overview of the current evidence and future perspectives in hepatobiliary surgery. Researchers in the field of hepatobiliary surgery are encouraged to submit an original article or review to this Special Issue, sharing experiences and discussing surgical approaches.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
