Early Clinical and Laboratory Diagnosis of Malignant Tumors

Message from the Guest Editor

With the deep understanding of the pathological progression of malignant tumors in addition to the development of new technology in the field of biology, we have found more new specific biomarkers for the early finding of incidences of mutation, risks of malignance, and early tumor formation. Advanced technologies, such as gene sequencing, PCR, biochips, microfluidic systems, quantum dot labeling, etc., have been used in clinical diagnoses, which will promote the early finding of tumors. On the other hand, new precision treatments and tumor prevention methods allow tumor reversal and early therapy to be available, which also promote the development of the "Early Clinical and Laboratory Diagnosis of Malignant Tumors". In this Special Issue, we welcome authors to submit papers on new methods and technologies of, as well as knowledge on, malignant tumor early diagnosis and prevention.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
