# Improving Diagnosis and Treatment of Vestibular Disorder: Latest Advances and Challenges

## Message from the Guest Editors

Advancements in vestibular testing methods like VNG, etc., have improved the diagnostic accuracy of various vestibular diseases, such as vestibular neuritis, etc. However, significant challenges persist in both diagnosis and treatment: Complexity of Vestibular Disorders: The wide variety of vestibular disorders presents a significant diagnostic challenge. Access to Advanced Diagnostics and Treatments: Although new diagnostic and treatment options are emerging, they are frequently inaccessible due to geographic or economic barriers, especially in low-resource settings. Lack of Consensus on Treatment Guidelines: There is a lack of universally accepted treatment guidelines for many vestibular disorders, leading to reliance on trial and error for treatment plans and making multidisciplinary care challenging. Understanding the Role of the Central Nervous System: The involvement of the central nervous system in vestibular disorders is not fully understood, with many disorders potentially exacerbated by central compensation mechanisms. Further research is essential to enhance treatment outcomes. In this Special Issue, we welcome authors to submit papers about these topics.

## Guest Editors

### Dr. Enrico Armato

1. Research Unit DevAH—Development, Adaptation and Handicap, Faculty of Medicine, University of Lorraine, 54500 Vandoeuvre-lès-Nancy, France
2. Department of Neurosciences, University of Padova, 35100 Padova, Italy

### Dr. Andrea Castellucci

ENT Unit, Department of Surgery, Azienda USL—IRCCS di Reggio Emilia, Reggio Emilia, Italy

### Dr. Athanasia Korda

ENT Unit, University of Bern, Bern, Switzerland

## Deadline for manuscript submissions

30 September 2025

# About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi
Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

### Author Benefits

**High Visibility:**
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:**
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

**Rapid Publication:**
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
