Clinical New Insights into Management of Scoliosis

Message from the Guest Editors

Spine deformations, especially scoliosis, reflect a wide range of complex conditions with different backgrounds and diverse treatment approaches. Despite advancements in understanding their etiology and treatment options, significant gaps persist in optimizing outcomes for patients. This Special Issue aims to gather the latest clinical and scientific research on scoliosis management, including innovative surgical and non-surgical treatments, rehabilitation techniques, and long-term care strategies. Key areas include understanding the underlying causes, risk factors, and progression patterns of scoliosis, as well as exploring advanced imaging, diagnostic tools, and treatment efficacy. Contributions addressing challenges in patient-specific care and interdisciplinary approaches to improving the quality of life of scoliosis patients and treatment results are particularly welcome. Researchers and clinicians are invited to contribute studies that push the boundaries of current treatment practices, ensuring a more comprehensive understanding of scoliosis and its management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
