New Clinical Advances in Pancreatobiliary Diseases

Message from the Guest Editor

Recent years have seen a paradigm shift in the diagnosis and management of pancreatobiliary diseases, driven by remarkable advances in both endoscopic techniques and pharmacologic therapies. Diseases such as early-stage pancreatic and biliary cancers, chronic pancreatitis, and cholangitis—once difficult to diagnose and treat—are now approached with greater precision and confidence.

The development of advanced endoscopic tools, including ERCP, EUS, cholangioscopy, and pancreatoscopy, has significantly improved diagnostic accuracy. Furthermore, interventional EUS and novel endoscopic procedures are expanding the therapeutic landscape, offering less invasive yet highly effective treatment options. In parallel, new pharmacological agents, including targeted therapies and immunotherapies, are emerging as promising alternatives or adjuncts to conventional treatment.

This Special Issue aims to explore new clinical perspectives and innovative therapeutic strategies for pancreatobiliary diseases. We welcome original research, reviews that highlight cutting-edge diagnostic and therapeutic developments—particularly those involving endoscopy and novel drug therapies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
