State of the Art in Bladder Cancer: Diagnostics and Treatment Strategies

Message from the Guest Editor

Bladder cancer continues to represent a complex and evolving area of urology, where innovation in diagnostics and treatment strategies is reshaping clinical practice. In recent years, technologies such as photodynamic diagnosis (PDD) and narrow-band imaging (NBI) have significantly improved visualization, allowing for the earlier and more accurate detection of tumors. At the same time, there is growing interest in bladder-sparing approaches. Minimally invasive surgery—particularly robotic-assisted techniques, both multi-port and single-port—is increasingly used across all age groups. In parallel, systemic therapies are rapidly advancing. Immunotherapy is now a cornerstone in the treatment of advanced or BCG-unresponsive disease, and ongoing research continues to explore new combinations and biomarkers to guide patient selection. This Special Issue aims to collect high-quality contributions that reflect the current landscape and future direction of bladder cancer management—from diagnosis to conservative strategies and surgical innovation. We welcome submissions that offer insight, evidence, and vision in addressing one of the most challenging urological malignancies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
