

## Special Issue

# Thromboembolic Disease and Antithrombotic Therapy

### Message from the Guest Editor

Venous thromboembolism is a common disorder affecting up to 1 in 12 individuals in their lifetime, with substantial healthcare and socioeconomic costs due to its recurrence and complications. The introduction of direct oral anticoagulants in the last decade marked a paradigm shift in the management of VTE, although there remains a significant disease burden represented by chronic complications such as post-thrombotic syndrome and chronic thromboembolic pulmonary hypertension, risk of recurrent thrombosis, bleeding risk associated with anticoagulation and substantial mortality. The next challenge in thrombosis management is the development of effective risk stratification methods using novel biomarkers to encompass the multifactorial contributors to thrombosis, including the various components of Virchow's triad and taking into account epigenetic mechanisms in modulating VTE. This Special Issue aims to bring together a body of literature that discusses the latest research in thromboembolic disease and antithrombotic therapy as we move toward personalized VTE therapy.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
