Clinical Updates in Allergic Rhinitis, Asthma and Other Respiratory Allergies

Message from the Guest Editors

The Special Issue aims to navigate the rapidly evolving landscape of allergic respiratory conditions, offering a comprehensive means of exploring recent clinical developments. From innovative diagnostic approaches to emerging therapeutic interventions, the collection addresses key challenges in managing allergic rhinitis, asthma, and related respiratory allergies. As the prevalence of these conditions rises, particularly in children, our Special Issue provides a platform for researchers and clinicians to share cutting-edge insights, bridge knowledge gaps, and enhanced patient care. We invite contributions in the form of original articles or reviews, fostering a collaborative exchange that contributes to the ongoing progress in the field.
