Persistent Postsurgical Pain: Current Challenges and Future Prospects

Message from the Guest Editor

Chronic Postsurgical Pain (CPSP) poses a significant challenge in the realm of surgical outcomes, impacting the quality of life and function for a considerable number of patients. The current challenges in addressing PPSP revolve around its complex etiology and multifaceted nature, involving an interplay of physiological and psychological factors. A biopsychosocial approach for understanding and coping with chronic pain takes into consideration the biological, psychological, and social factors encompassing a wider variety of treatment options. The interplay between preoperative. intraoperative, and postoperative variables further complicates prediction and prevention efforts. Future prospects in addressing CPSP lie in advancing our understanding through interdisciplinary research, integrating insights from pain medicine, orthopedics, and psychology. Non-pharmacological treatments for postsurgical pain play a crucial role in providing holistic and multimodal pain management strategies. The implementation of personalized medicine approaches, such as predictive modeling, holds promise in identifying patients at higher risk for developing CPSP and tailoring interventions accordingly.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
