Advances in Ablation Therapy for Atrial Fibrillation: Innovations and Clinical Applications

Message from the Guest Editor

Atrial fibrillation (AF) represents the most frequent sustained cardiac arrhythmia and imposes a significant burden on patients and healthcare systems. Management strategies encompass a broad spectrum of both pharmacological therapies and interventional approaches tailored to patient-specific needs. Recent advances in ablation therapy have revolutionized AF treatment, with catheter ablation emerging as the most efficacious intervention for sustaining a normal sinus rhythm, surpassing other therapeutic modalities in long-term rhythm control.

Over the past two decades, significant progress has been made in ablation technology and strategy development, focusing on enhancing efficacy and safety.

This Special Issue aims to highlight the latest advancements in AF ablation therapy, and we encourage submissions of original research, reviews, and meta-analyses focusing on novel interventional techniques and therapeutic strategies for AF management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
