Gynecologic Mini-Invasive Operations: Current Updates and Perspectives

Message from the Guest Editors

Minimally invasive surgery represents, when feasible, the approach of choice to reduce morbidity, complications and length of hospitalization. Offering the most effective and mini-invasive treatment options is of the utmost importance in gynecological surgery to protect women's health. These involve endoscopy, laparoscopy, robotics, transvaginal procedures, and natural orifice endoscopy. Surgical advancements regard patients with oncologic and benign conditions, they have an impact on the patients' quality of life. The successful management of these conditions usually requires the work of a team of specialists, the contribution of new technologies, and mini-invasive surgical solutions to minimize complications and reduce postoperative recovery. It is our responsibility to share our experience and scientific data in order to offer our patients the best possible available management for their conditions. This Special Issue of Journal of Clinical Medicine is dedicated to offering an overview of new minimally invasive gynecological surgical procedures for women's health. Groups from all specialties are encouraged to submit original research articles and reviews.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
