Special Issue

Novel Insights into Antiplatelet Therapy in Cardiovascular Disease

Message from the Guest Editor

Cardiovascular disease management has evolved significantly with advancements in antiplatelet therapy. This Special Issue delves into cutting-edge insights across several key areas of antiplatelet treatment in cardiovascular disease. It explores various modification strategies, such as de-escalation and escalation, with or without specific guidances, and the integration of novel oral anticoagulants with antiplatelet agents in coronary artery disease. Additionally, it includes rapidly evolving antiplatelet therapy strategies for structural heart disease interventions, such as transcatheter aortic valve replacement. Personalized antiplatelet therapy, which tailors treatment to individual patient needs and risk profiles, is also a critical focus. Research on diagnostic tools and strategies to support personalized approaches is particularly encouraged. Contributions to this Special Issue aim to provide comprehensive updates and discussions on optimizing therapeutic strategies, in managing various risk populations, thereby improving overall clinical outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
