High Flow Nasal Cannula in Acute and Chronic Settings: Trends of Use and Outcomes

Message from the Guest Editors

High flow nasal cannula is a relatively new type of noninvasive respiratory support that has been increasingly used in clinical practice over the last decade, and its use has been extended beyond intensive care and respiratory high dependency units to emergency departments, general wards, and outpatient clinics. This Special Issue will address unanswered questions on the application of high flow nasal therapy in both acute and chronic settings. Topics include but are not limited to: Prevalence and current clinical practices;

Use in combination with other treatments or respiratory supports;

Clinically relevant outcomes and patient-oriented outcomes;

Timing of initiation/discontinuation;

Criteria for treatment escalation or failure;

Factors associated with failure and success;

Adherence and compliance to treatment;

Patient tolerance and comfort;

Aspects related to the device, oxygenation, humidification, tubing, nasal cannula, alarm.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
