Recent Advances in Bariatric Surgery

Message from the Guest Editor

Bariatric surgery has evolved dramatically in recent years, becoming a cornerstone in the management of severe obesity and related metabolic disorders. Advances in minimally invasive techniques, perioperative care, and long-term patient management have significantly improved safety profiles and outcomes. Moreover, the understanding of the metabolic mechanisms underlying weight loss and remission of comorbidities such as type 2 diabetes has expanded, leading to the concept of metabolic surgery. This Special Issue, 'Recent Advance in Bariatric Surgery', aims to highlight cutting-edge developments in surgical procedures, patient selection, pre- and postoperative management, and long-term follow-up. It also welcomes research on emerging technologies, such as robotic-assisted surgery, enhanced recovery protocols, and endoscopic bariatric interventions. By bringing together original research, reviews, and clinical perspectives, this Special Issue seeks to provide an updated and comprehensive overview of the current landscape and future directions of bariatric and metabolic surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
