

Special Issue

Clinical Research in Viral Hepatitis

Message from the Guest Editors

Viral hepatitis is responsible for chronic infections and deaths in millions of cases worldwide. The hepatitis B (HBV) and hepatitis C (HCV) viruses remain major sources of morbidity and mortality globally, and HBV/hepatitis D virus (HDV) coinfection worsen the symptoms of hepatic disease. Furthermore, acute viral hepatitis is one of the most common infectious illnesses due to the hepatitis A (HAV) and hepatitis E (HEV) viruses.

In light of this discussion, we are delighted to announce the upcoming Special Issue of Clinical Medicine entitled “Clinical Research in Viral Hepatitis”. This Special Issue aims to discuss clinical outcomes for people living with viral hepatitis and new relevant research in this field. We invite scholars to submit original research, communications, and review articles. We look forward to receiving your evaluable scientific contributions.

- HCV/HBV/HDV/HEV/HAV
- clinical issues
- antiviral resistance
- clinical outcome

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
