Spinal Trauma: Management and Treatment Strategies

Message from the Guest Editors

Spinal trauma is a common clinical problem that can result from both high-velocity injuries, such as motor vehicle accidents, and low-velocity injuries, such as minor falls. The management of fractures due to these traumas varies based on the severity of injury to the spine, the presence or absence of instability, the likelihood of healing without surgical intervention, pain, and importantly, the presence of neurological deficits, amongst other components. Great variability exists with regard to how these fractures are treated, and clear guidelines with regard to the optimal treatment strategies are lacking. This is partially due to the lack of literature on the subject to help direct clinical management. Consequently, this Special Issue aims to provide a collection of research in an effort to help advance the management of spinal trauma and discuss surgical treatment strategies for all types of spinal injuries arising from trauma.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
