Physiotherapy and Rehabilitation for People with Rheumatic and Musculoskeletal Diseases

Message from the Guest Editors

Rheumatic and musculoskeletal diseases (RMDs) include more than 200 different diseases affecting structures such as joints, bones, tendons, nerves, muscles, and in some cases, internal organs. These diseases benefit from early diagnosis and prompt drug treatment. However, several of the diseases are complex and warrant biopsychosocial approaches and well-designed interdisciplinary cooperation over time. Rehabilitative strategies are not only needed to decrease symptoms and disability, but are also essential for secondary prevention.

To more efficiently meet the future challenges of people with RMDs, more research is needed to find successful rehabilitative strategies for prevention, secondary preventions, and to treat and reduce the burden of RMDs and to implement them in daily clinical practice. The scope of this Special Issue is to provide an overview of the recent advances and cutting edge research in the field of RMD rehabilitation and physiotherapy. Therefore, researchers in the field of RMDs are encouraged to submit an original article or review to this Special Issue (case reports and short reviews are not accepted).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France
